IS Cube

Weighing and Dimension Scale

IS Cube uses advanced sensing technology to accurately determine the cubic dimensions of freight.
Measure dimension and weigh material at the same time.
Easy to use. Just put the material on platform, without push any button. And can print the result directly.
Dimensions material in less than 10th of a second.
With IS Cube can removes the potential for human error when taking measurements.

- Measure dimension and weigh material at the same time & real time
- Input prices
- Print result directly
- Practical solution

Feature

- Bright LCD display for displaying Dimension Data
- High quality Weighing Indicator
- Ultrasound sensor system
- Input prices
- Print the result direclty
- Output to PC and ticket printer
- Measure dimension and weigh materail at the same time
- Completely eliminate manual measurement

MK-E1005 Indicator

IS-Cube Indicator

Specifications

Scale

Available capacities	30kg ~ 1000kg
Resolutions	3000 ~ 6000d
Weight sensor	Loadcell

Measurement

Available ranges	30cm ~ 150cm
Increment	0.3 cm
Tolerance	+/- 2cm
Minimum object size	4 x 4 x 4cm
Measurement sensor	Ultrasound

Other

Data output	RS-232
Power source	220VAC
Operating temperature	0º ~ 40º C
